KEYNOTE

OPENING KEYNOTE - K1

Join us to kick off Snowflake Summit 2025 in San Francisco! Come hear from Snowflake's CEO, Sridhar Ramaswamy, as he discusses the impact AI has had across organizations and how the Snowflake AI Data Cloud is helping to accelerate enterprise AI. He'll be joined by Lynn Martin, President of the New York Stock Exchange Group, for a conversation on how data and AI are being used to power operations and shape the future of global markets. Then, in a CEO fireside conversation, Sridhar and OpenAI Founder and CEO Sam Altman will explore what the future holds in this new AI era.

UNLOCKING ALPHA: AI-POWERED EARNINGS CALL ANALYSIS WITH S&P GLOBAL & SNOWFLAKE , AI250

This hands-on lab explores the integration of Snowflake Notebooks and Cortex AI with S&P Global Market Intelligence’s Machine-Readable Transcripts dataset to analyze executive communication during earnings calls. Learn how to use LLMs and vector similarity techniques to score executives on transparency and responsiveness. Research shows that executives who proactively address market queries with clear answers consistently outperform their peers, while those who are reactive or off-topic tend to underperform. A portfolio strategy based on these communication styles has been shown to generate +515bps of annualized alpha. Join us for a hands-on experience.
